## **Pet CPR and First Aid: for the Pacific Northwest Newfoundland Club**

**10 AM October 18th 2025, @ The Working Dog, LLC 82631 Weiss Rd Creswell, OR 97426**

Having the skills and knowledge to help our dogs in an emergency can save their lives. Often, help isn't readily available when something happens, and owners don't know how to assist their dogs before they get to a veterinarian. Knowing how to access, support, and react to emergencies and minor situations with your dog can save a life.

### **You will learn:**

- What to do if your dog is choking, bleeding, or in shock
- How to assess your dog's vital signs so you can get a better idea of what is going on
- How to put together a first aid kit for your dog and what contents should be included
- What to do if your dog is bitten by an insect or a snake or stung by a bee
- What to do if your dog is suffering from hypothermia, heatstroke, or if your dog is having a seizure
- Pet CPR—Mouth-to-snout CPR can save a dog's life. Try it on a canine manikin.

**Students who complete the training receive a 2-year certification**
